Leveraging the latest in Tech advancements, our GCCs are equipped with high-speed internet, advanced computing resources, and robust software solutions. This infrastructure supports seamless operations and innovation.

Monitoring

Leveraging the latest in technological advancements, our GCCs are equipped with high-speed internet, advanced computing resources, and robust software solutions. This infrastructure supports seamless operations and innovation.

The Company's Strategic Solution For **Mid-Sized Corporates**

Objectives

Enhance operational efficiency by **streamlining processes** and leveraging cost-effective solutions to **maximize productivity** and profitability.

Challenges

Mid-size corporations often struggle with allocating adequate resources, both financial and human, to **support large-scale expansion** without impacting day-to-day operations.

Solutions

For mid-sized corporations, Inductus offers a similar suite of services tailored to a more cost-effective bracket. Our solutions are designed to help you **scale up** and tap into **sustainable innovation**, allowing you to compete effectively in your market.

WHAT YOU GET

Compliance

We adhere to global standards and regulations, ensuring that all our processes and operations meet the highest compliance requirements. This guarantees that your business remains secure and compliant with international laws.

Security

Our facilities are equipped with advanced security measures, including biometric access, 24/7 surveillance, and secure data management systems. We prioritize the confidentiality and integrity of your information.

"For over 17 years, we've been developing new processes & technology for enterprises of all sizes. Our mission is to provide companies with cutting-edge products that enable employees to work better and smarter."

ANKIT ARORA

Director - Operations

Achieve More with Inductus' Seamless **Project Outsourcing**

POTENTIAL RESERVATIONS

Potential clients may harbor concerns about project outsourcing, such as loss of control over processes, data security, and quality assurance. However, outsourcing to Global Capability Centers (GCCs) addresses these issues by offering **robust project management** frameworks, stringent **data protection protocols**, and adherence to **international quality standards**.

For instance, GCCs in India, backed by an industry known for its IT prowess, ensure a **secure, controlled, and high-quality project execution** environment. This not only mitigates risks but also enhances efficiency, as evidenced by a 2023 Deloitte report, which found that 59% of companies outsource to improve business efficiency.

WHO & WHY

Project outsourcing through GCCs is suitable for a wide range of industries, including IT, finance, healthcare, and legal services. Organizations, especially SMEs, can leverage these centers to gain access to **specialized expertise** and **next-gen technologies** without significant capital investment.

According to NASSCOM, India's GCC market is projected to reach **\$60 billion** by 2025, highlighting the growing trust and reliance on these centers for strategic and operational support. By outsourcing to GCCs, businesses can achieve **cost reductions of up to 50%**, **optimize resource allocation**, and **focus more on core competencies**, driving overall growth and innovation.
